

If you need to obtain a duplicate medical, fingerprint or registration form:

Registration default system:

- When the participant first registered, an 8 digit code was produced allowing each registrant to access their registration using the email of the participant and this code.
- The person completing the form should have written this code down as indicated on the registration page as a resource to access their registration should they need to correct or reprint their registrations.
- This code is also found on the printed registration/medical/fingerprint forms

If you have the code –

- go to the registration page of this website, enter participant email, and code to access the registration –
- click “ SUBMIT” and new forms will be generated as well as emailed again to the participant email and group leader

If this code was not documented –

- but you have a printed copy of the registration form, the code is found on the lower right corner of printed forms (fingerprint, registration or medical).

IF you do not have any of your papers to find the code –

- but you did SUBMIT a registration then:
- Please check the email of the participant for the PDF duplicate that was sent when the registration was first completed
- The group leader also received a copy of every participant’s registration and medical form in an email when the registration was first completed. Check with your group leader.

Lastly - IF you have not submitted or printed and cannot find any paperwork in emails -

- simply register online again.
- It will not affect any data - but it will produce registration and medical forms, including the email back up.
